

MOOSE BOATS DELIVERS M2-35 CATAMARAN PATROL BOAT TO NEW YORK CITY POLICE DEPARTMENT

FOR IMMEDIATE RELEASE - Petaluma, CA. – August 22, 2013

Moose Boats, a boat designer and manufacturer in the San Francisco Bay Area, delivered a M2-35 Catamaran Fire Rescue Boat to New York City Police Department.

The aluminum 35 foot catamaran vessel is a sister ship to NYPD's existing Moose Boats M2-35 catamaran which has been in service since December 2009. The vessel will be responsible for patrol, search and rescue, recovery and dive operations in New York Harbor and the East and Hudson Rivers.

Propulsion is achieved by twin Yamaha 350hp four stroke outboards and a Kohler diesel generator powers integrated heated decks and windows as well as reverse cycle air conditioning.

The Moose Boat is fitted with heavy-duty bow and fendering-collar rub strake to allow NYPD to deploy personnel on to the City's piers while a large foredeck locker houses radiation detection equipment to support counter-terrorism patrols.

New York City Police utilized FEMA Port Security Grant Program funding to purchase the Moose Boats M2-35.

Moose Boats has constructed patrol and law enforcement vessels for agencies throughout the United States since 2000. Moose Boats are currently in service with US Park Police, US Navy, Los Angeles County Sheriff, Los Angeles Police Department, King County Sheriff, Port Authority NY/NJ, New York Naval Militia, New York Police Department, Contra Costa County Sheriff, Massachusetts State Police, New Jersey State Police, Oakland Police Department and San Francisco Police Department. Moose Boats currently has patrol craft under construction for Long Beach Police Department and Bridgeport Police Department and repeat orders for Los Angeles Police Department, New Jersey State Police and Port Authority NY/NJ.
