MOOSE BOATS DELIVERS M1-46 CATAMARAN TO THE SAN FRANCISCO FIRE DEPARTMENT'S AIRPORT DIVISION AT SFO

FOR IMMEDIATE RELEASE - Mare Island - Vallejo, CA – July, 2026

Moose Boats is proud to deliver an M1-46 fire rescue catamaran vessel to the San Francisco Fire Department's Airport Division. This will be the second M1 that the San Francisco International Airport will have available for emergency calls in the waters surrounding the runways. While many of the systems have been upgraded from their previous Moose Boat, the platform and controls have remained the same, enabling a seamless transition for pilots and crew to operate from.

According to San Francisco Fire, *"The Airport Division is responsible for providing fire protection, fire prevention, code enforcement, emergency medical services, water rescue operations and hazardous materials abatement for the San Francisco International Airport."*

SFO is the 13th busiest airport in the United States accommodating over half a million passengers weekly. Moose Boats' dependable 46-foot M1 will be the rescue boat used by the San Francisco Fire Department in case of emergency at the airport.

The vessel includes a 1,000 GPM pump, twin turbo diesel Cummins QSC 8.3 600 HP engines, storage for over 50 life rafts (each capable of carrying 10 persons), and a climate-controlled cabin featuring a dedicated patient care bench. The M1 Moose Boat will be stored at the Marine Emergency Response Facility near Seaplane Harbor allowing for a rapid emergency response time.

"This Emergency Water Rescue Facility is believed to be the only one of its kind at West Coast airports," San Francisco Fire reported.

Additionally, the San Francisco Fire Department Airport Division will retain its existing M1 Moose fireboat as a reserve vessel to serve the community and airport when needed, ensuring continuous service during annual maintenance of the new boat.
